

# Workshop

## Low dimensional physics and gauge principles

September 21-26, 2011, Alikhanian National Laboratory, Yerevan, Armenia

28-29, 2011, Andronikashvili Institute of Physics, Tbilisi, Georgia

The topics of the workshop will be centered on statistical mechanics of condensed matter systems and field theoretical methods, nonlinear dynamics, applied to particle physics and cosmology.

The workshop will mark the 80th birthday of Professor Sergei Matinyan, the founder of schools of theoretical high energy physics both in Tbilisi and Yerevan.

A volume containing the selected contributions to the workshop will be published by World Scientific.

### *Local Organizing Committee*

H.Khachatryan (chair), T.Ghahramanyan,  
Sh.Khachatryan, E.Poghosian, S. Sargsyan, G. Yegoryan
