

LIST of publications of the members of SEVAN network

Chilingarian, A., Babayan, V., Karapetyan, T., Mailyan, B., Sargsyan, B., and Zazyan, M. (2018). The SEVAN Worldwide Network of Particle Detectors: 10 Years of Operation. *Adv. Space Res.* 61, 2680–2696. doi:10.1016/j.asr.2018.02.030

A.Chilingarian, J.Knapp and M.Zazyan, Monitoring of the atmospheric electric field and cosmic-ray flux for the interpretation of results in high-energy astroparticle physics experiments, EPJ Web Conf., Volume 197, 2019, Atmospheric Monitoring for High-Energy Astroparticle Detectors (AtmoHEAD-2018), Article 03001.

K.Apresyan, A.Chilingaryan, A.Ghalumyan, V. Ghazaryan, Upgrade of YerPhI polarization LIDAR System for Investigation of the Influence of Static Electric Fields on the Elastic and Raman Backscattered Beams Polarization, *The European Physical Journal Conferences* 197(6):03005, DOI: 10.1051/epjconf/201919703005

A.Chilingarian, H. Mkrtchyan, G. Karapetyan, et al., Catalog of 2017 Thunderstorm Ground Enhancement (TGE) events observed on Aragats, (2019) *Nature Scientific Reports* 9(1):6253, DOI: 10.1038/s41598-019-42786-7

Chilingarian, A., Hovsepyan, G., Karapetyan, G., and Zazyan, M. (2021). Stopping Muon Effect and Estimation of Intracloud Electric Field. *Astroparticle Phys.* 124, 102505. doi:10.1016/j.astropartphys.2020.102505

Chilingarian, A., Karapetyan, T., Zazyan, M., Hovsepyan, G., Sargsyan, B., Nikolova, N., et al. (2021c). Maximum strength of the atmospheric electric field. *Physical Review D*, 103, 043021. <https://doi.org/10.1103/physrevd.103.043021>

Chilingarian, Ashot, Karapetyan, Tigran, Zazyan, Mary, *et al*: Analyzing atmospheric electric field by the European SEVAN network of particle detectors, urn:nbn:de:gbv:8:3-2021-00270-4

Chilingarian, A., Hovsepyan, G., & Zazyan, M. (2021). Muon tomography of charged structures in the atmospheric electric field. *Geophysical Research Letters*, 48, e2021GL094594. <https://doi.org/10.1029/2021GL094594>

A.Chilingarian, High Energy Physics in the Earth's Atmosphere, *Природа* 3, 11, 2021.

A. Chilingarian, D. Aslanyan, B. Sargsyan, On the origin of particle flux enhancements during winter months at Aragats, *Physics Letters A* 399 (2021) 127296

Ashot Chilingarian, The progress of High-Energy Physics in Atmosphere achieved with the implementation of particle physics and nuclear spectroscopy methods, 2021, 37th International Cosmic Ray Conference, DOI: 10.22323/1.395.0366

Kudela, K., Chum, J., Kollárik, M., Langer, R., Strhárský, I., and Bařse, J. (2017). Correlations between Secondary Cosmic Ray Rates and Strong Electric Fields at Lomnický Štít. *J. Geophys. Res. Atmos.* 122, 700–710. doi:10.1002/2016JD026439

Chum, J., Langer, R., Bařse, J., Kollárik, M., Strhárský, I., Diendorfer, G., et al. (2020). Significant Enhancements of Secondary Cosmic Rays and Electric Field at the High Mountain Peak of Lomnický Štít in High Tatras during Thunderstorms. *Earth Planets Space* 72, 28. doi:10.1186/s40623-020-01155-9

Chum J, Kollárik M, Kolmasřová I, Langer R, Rusz J, Saxonbergová D and Strhárský I (2021) Influence of Solar Wind on Secondary Cosmic Rays and Atmospheric Electricity. *Front. Earth Sci.* 9:671801. doi: 10.3389/feart.2021.671801

Ivo Angelov, Todor Arsov, Nina Nikolova, and Christo Angelov, Cosmic rays muons variations measurements with the muon telescope and the SEVAN detector at BEO – Moussala, AIP Conference Proceedings 2075, 080001 (2019); <https://doi.org/10.1063/1.5091202> Published Online: 26 February 2019

Nina Nikolova, Karel Kudela², Ronald Langer, Igor Strhárský et al., SEVAN detector measurements at BEO Moussala and Lomnický Štít: First experience from 2014-2017, AIP Conference Proceedings 2075, 130028 (2019); <https://doi.org/10.1063/1.5091313>

F. Šterc, D. Rořa, D. Marićić, et al., SEVAN particle detector at Zagreb Astronomical Observatory: 10 years of operation, Proceedings of Tenth Workshop “Solar Influences on the Magnetosphere, Ionosphere and Atmosphere”, Primorsko, Bulgaria, June 4 - 8, 2018

D. Marićić · B. Vrřnak · M. Dumbovic´, et al., Kinematics of Interacting ICMEs and Related Forbush Decrease: Case Study, *Solar Phys* (2014) 289:351–368 DOI 10.1007/s11207-013-0314-8
